SUMMARY

Software engineer and MCA candidate graduating July 2026, applying for a Software Engineering Internship. Builds full-stack and backend systems in Python, Java, and JavaScript on a strong foundation of data structures, algorithms, and object-oriented design. Delivered production REST APIs and full-stack services on Linux for a robotics control platform and backend systems serving 500+ daily API requests.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

REVA University, Bangalore

CGPA: 8.63 / 10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Web Technologies.

Bachelor of Computer Applications (BCA)

2021 – 2024

Nazareth College of Arts and Science, Tiruvallur

CGPA: 7.26 / 10

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, Shell Scripting

CS Foundations: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Backend & APIs: Node.js, Flask, REST API Design, Webhook Integration, Real-Time Event Processing

Frontend: React, JavaScript, HTML, CSS, Responsive UI

Data, Cloud & Tools: MySQL, Firebase, Microsoft Azure, Git, GitHub, Postman, Linux, Raspberry Pi (Embedded Linux)

Machine Learning: YOLOv8, OpenCV, Object Detection, Computer Vision

Soft Skills: Communication, Cross-Functional Collaboration, Ownership, Analytical Thinking, Agile / Scrum

EXPERIENCE

Software Developer Intern

Mar 2026 – Jul 2026

Infiposts Private Limited | MORO Robotics Platform | Bangalore, India

- Contributed to computer vision and AI model development for the MORO project, a robotics product.
- Assisted in vision model development and image/video data processing. Ran model testing and evaluation; supported AI-based object detection tasks.
- Assisted with backend development, routing, and API handling for platform modules.
- Took part in technical discussions, research, and workflow optimisation in a startup team.

Backend Developer & API Integration Intern

Dec 2025 – Mar 2026

Vision Printt Technologies (MIMO) | Bangalore, India

- Served 500+ daily API requests across integrated services by building production backend systems in Python and Node.js.
- Enabled real-time event processing by designing and deploying 5+ secure REST APIs with webhook integrations.
- Cut manual operator effort by ~60% by unifying WhatsApp Cloud API, two payment gateways, and printer automation into one webhook pipeline.
- Automated the IoT print queue on Raspberry Pi (embedded Linux), removing a manual step and fixing device connectivity failures.

PROJECTS

AI-Based Real-Time Accident Detection System

2025

Python, YOLOv8, OpenCV, Flask, Telegram API

- Reached 87%+ detection accuracy on live video streams by training a YOLOv8 model on a custom accident dataset.
- Reduced false positives by ~35% by adding confidence-score validation and frame-level filtering with OpenCV.
- Enabled automated incident alerting by building a Flask dashboard integrated with the Telegram API.

E-Book Buying System

2024

Python, Flask, Firebase, REST API

- Shipped a Flask + Firebase web app with auth and catalog management, exposing REST APIs for browsing, cart, and simulated payments.

LEADERSHIP & ACHIEVEMENTS

- Selected among the top NCC cadets for the Chief Minister's Guard of Honour, 2025 (merit-based, state contingent).
- Represented college at the State-Level RDC Pre-Intergroup Competition, Tambaram, 2024.

CERTIFICATIONS & PATENT

- Microsoft Certified: Azure AI Fundamentals (AI-900), 2026.
- Patent filed: "Biometric Verification using Aadhaar Fingerprint Authentication" (Application No. 202541065407), 2025.
