

P MAHESH KUMAR

Full Stack Developer | MCA Student, REVA University, Bangalore

maheshdevi407@gmail.com | +91 8610230570 | Bangalore, Karnataka | linkedin.com/in/maheshdevi | github.com/Maddymahesh407

PROFESSIONAL SUMMARY

MCA student and Full Stack Developer with hands-on production experience in backend development, AI-based systems, and IoT automation. Currently serving as Team Lead at Infiposts, leading development of MORO — a robotics-based product. Skilled in Python, Java, Node.js, REST APIs, and SQL with practical frontend experience in React and HTML/CSS. Microsoft Azure AI Certified (AI-900). Proven ability to build and ship production-level API integrations, real-time automation systems, and machine learning pipelines. Holds a filed patent on biometric identity verification. Experienced in Agile/Scrum workflows.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks & Libraries: Node.js, Flask, REST APIs, OpenCV, YOLOv8

Databases: MySQL, Firebase

Cloud & DevOps: Microsoft Azure, GitHub

Tools & Platforms: Raspberry Pi, Telegram API, WhatsApp Cloud API, Postman

Methodologies: REST API Design, Webhook Integration, IoT Automation

INTERNSHIP EXPERIENCE

Vision Printt Technologies (MIMO) | *Backend Developer & API Integration Intern* Dec 2025 – Mar 2026

- Built production-level backend systems using Python and Node.js, handling 500+ daily API requests across integrated services.
- Designed and deployed 5+ secure REST APIs with webhook integrations for real-time event processing.
- Integrated WhatsApp Cloud API, 2 payment gateways, and printer automation services, reducing manual intervention by ~60%.
- Developed IoT-based print queue automation using Raspberry Pi, improving print throughput efficiency.
- Collaborated with product team to deliver tested, documented backend modules on schedule.

Infiposts Private Limited | *Team Lead – Full Stack Developer* Mar 2026 – Present

- Leading full-stack development of MORO, a robotics-based product, as Team Lead — owning end-to-end architecture across frontend, backend, and software integration.
- Designed and optimized REST API endpoints and core routing logic for the MORO platform, enabling reliable robot-control communication.
- Conducted code reviews and led QA testing cycles, maintaining code quality standards and improving system performance across sprint iterations.
- Coordinated cross-functionally with product, design, and engineering stakeholders; mentored junior developers and ensured sprint deliverables were met on schedule.

ACADEMIC PROJECTS

AI-Based Real-Time Accident Detection System

- Trained YOLOv8 object detection model on custom dataset, achieving 87%+ detection accuracy on video streams.
- Processed live video frames with OpenCV; implemented confidence-score validation to reduce false positives by ~35%.
- Built Flask-based monitoring dashboard with Telegram API alerts for instant incident notification.

E-Book Buying System

- Developed a Flask web application with Firebase backend supporting user authentication and book catalog management.
- Implemented REST API endpoints for browsing, cart management, and a simulated payment workflow.

CERTIFICATIONS & PATENT

Microsoft Certified: Azure AI Fundamentals (AI-900) — 2026

Patent Application Filed: Biometric Verification using Aadhaar Fingerprint Authentication

Application No: 202541065407 | Status: Filed (2025)

- Proposed secure fingerprint-based authentication system for examination center access to prevent impersonation.
- Designed real-time identity validation workflow integrated with Aadhaar biometric infrastructure.

EDUCATION

MCA – Master of Computer Applications (Pursuing)

2024 – Present

REVA University, Bangalore | CGPA: 8.40 (Sem 1–3, Sem 4 awaited)

BCA – Bachelor of Computer Applications

2021 – 2024

Nazareth College of Arts and Science, Tiruvallur | CGPA: 7.26

ACHIEVEMENTS

- Represented college at State-Level RDC – Pre-Intergroup Competition, Tambaram.
- Participated in Chief Minister's Guard of Honour — selected among top NCC cadets.
